Our product offering will continuously be expanded and upgraded based on the input we receive from our users and our own extensive market analysis. BSC is a blockchain-based decentralized platform that aims to build a free, global digital content Entertainment system with distributed Blockchain Technology, and allows easy and Cost-effective sharing of digital content. This create secure lending environment where the lender receive a high yield interest rate annually (Apy) paid of staking.

Introduction of ELUCKS

A deflationary asset and stable token with dumping protections and monetary incentives for holding is the goal of ELUCKS Coin. It is a utility token. Additional burns and reward systems, such as yield farming/staking, airdrops, and NFT drops, are being considered and will be implemented into the Tokenomics of ELUCKS Coin. Elucks Coin Network plans on becoming a blockchain enterprise specifically designed for global payments. ELUCKS COIN is a fully decentralized ecosystem with peer-to-peer transactions developed on the Binance Smart Chain (BSC). ELUCKS initially run on the BSC blockchain with BEP 20 Standard but it is going to become the native coin of the ELUCKS.

Enter Blockchain

Blockchain is a secure record of every single Transaction made using a Cryptocurrency. Verified transaction is added to the blockchain as part of the mining process. In banking, this done with ledger which track the flow of money through accounts. While it's possible to buy cryptocurrency all you need is a digital wallet as part of a free app or a cryptocurrency tax software-finding places that will accept it, the variable transaction Charges and volatile exchange rates make buying and selling with it difficult. Binance Smart Chain (BSC) is best described as a blockchain that runs in parallel to the Binance Chain.

Development Team
